Contents

Volume 16

1 Invited Review
System dynamics and operational research: An appraisal
J.A. Sharp and D.H.R. Price

13 Forecasting manpower losses by the use of renewal models (*Case Study*)
M. Şirvanci

19 Safety stocks and the paradox of the empty period
B. van der Veen

34 Modelling product positions through the use of multidimensional scaling techniques: An empirical investigation
G.J. Hooley

42 Converging conflicting forecasting parameters in forecasting durable new product sales
K.D. Lawrence and M. Geurts

48 Decision support systems for semi-structured buying decisions
E. Jacquet-Lagrèze and M.F. Shakun

59 Transmission facility planning in telecommunications networks: A heuristic approach
I. Baybars and K.O. Kortanek

84 Simultaneous lot-sizing and capacity planning in multi-stage assembly processes
J.D. Blackburn and R.A. Millen

94 Application of CCP-W-DPC to a radar detection problem
F. Ünlü

98 A general model for the behaviour of infinite buffers with periodic service opportunities
H. Bruneel

107 Inexact linear programming with generalized technological matrix sets
J.F. Bard

113 An integration of efficiency projections into the Geoffrion approach for multiobjective linear programming
H.-M. Winkels and M. Meika

128 Book Reviews

137 EURO Bulletin

139 Invited Review
Network models for vehicle and crew scheduling
P. Carraresi and G. Gallo

152 Media selection by mean-variance analysis (*Case Study*)
C.A. de Kluyver and F.T. Baird

157 Allocating blood to hospitals from a central blood bank
C. Sapountzis

163 A multi-level bottleneck assignment approach to the bus drivers' rostering problem
P. Carraresi and G. Gallo

174 A network flow procedure for project crashing with penalty nodes
A. Kanda and U.R.K. Rao

183 Network production-location problems under price uncertainty
A.P. Hurter, Jr. and J.S. Martinich

198 Optimal control policies for resource allocation in an activity network
E. Nowicki and S. Zdrzałka

215 Network flows and non-guillotine cutting patterns
M. Biró and E. Boros

222 A parametric algorithm for convex cost network flow and related problems
R.K. Ahuja, J.L. Batra and S.K. Gupta

236 On a multicriteria shortest path problem
E.Q.V. Martins

246 Joint distribution of sojourn time and queue length in the M/G/1 queue with (in)finite capacity
O.J. Boxma

257 Tables for M/G/c queuing systems with phase-type service
H. Groenevelt, M.H. van Hoorn and H.C. Tijms
270 Outranking approaches versus MAUT in MCDM (*Short Communication*)
J. Siskos, G. Wäscher and H.-M. Winkels
272 Book Reviews
279 Call for Papers
282 EURO Bulletin

285 Invited Review
Generalized linear models
P. McCullagh
293 OR as education
R. Gault
308 An evaluation of a sales training programme in a retailing environment (*Case Study*)
P. Doyle and D. Cook
314 Optimal mining of a stratiform phosphate field
A. Mehrez, U. Regev and A. Stulman
319 A heuristic algorithm for the multidimensional zero-one knapsack problem
M.J. Magazine and O. Oguz
327 Large-scale mixed integer programming: Benders-type heuristics
G. Côté and M.A. Laughton
334 A super-linear convergent gradient projection type algorithm for linearly constrained problems
F. Wu
345 Experimental study on the efficiency and accuracy of a chance-constrained programming algorithm
Y. Seppälä and T. Orpana
358 Plausibility relations and multiple expected utilities in decision-making under uncertainty
M. Rizzi
365 Parsimonious modelling and forecasting of seasonal time series
S.A. Roberts and P.J. Harrison
378 Strong planning and forecast horizons for a model with simultaneous price and production decisions
G.L. Thompson, S.P. Sethi and J.-T. Teng
389 Book Reviews
398 EURO Bulletin
400 Erratum
401 Contents Volume 16
